

CANDIDATE NAME _____

2022 CHINSAPO CLUSTER MOCK

2022 MALAWI SCHOOL CERTIFICATE OF EDUCATION

BIOLOGY

Date__/_/2022

PAPER II

Subject Number: MO

(40 marks)

Time allowed: 1hr 30min

INSTRUCTIONS

1. This paper contains 7 pages please check
2. Write your at the top of this page and of every sheet
3. Answer all the four question in the spaces provided on question paper. The maximum number of marks for each question is indicated against each question.
4. In the table provided on this page, tick against the question number you have answered
5. You should hand in your paper to the invigilator when time is called to stop writing

Question number	Tick if answered	Do not write in these columns	
1			
2			
3			
4			

3. You are provided with the following

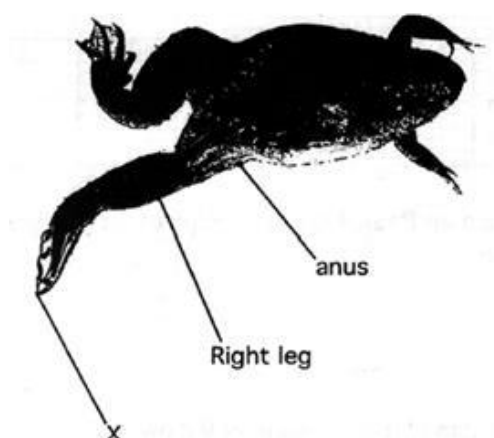

- Specimen labeled **K** and **Y**
- a razor blade / scalpel
- iodine solution
- a dropper

a) using a razor blade / scalpel, cut a piece of specimen K in cross section

TREATMENT	OBSERVATION	CONCLUSION
Add iodine solution to the cut specimen		

(2 marks)

b) The figure below is the diagram of a frog. Use it to answer the questions that follow

i. Measure the longest axis of the frog in (mm)

1mark

ii. .If the diagram of the frog was made from the actual length of 60 mm, calculate its magnification. Show your working.

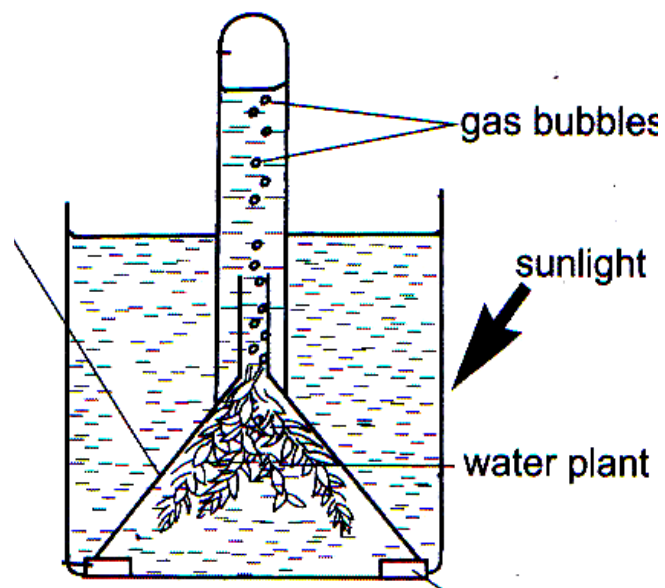

3 marks

CANDIDATE NAME _____

iii. Describe how you could taste specimen Y for the presence of vitamin C

4marks

4. The figure 2 show an experimental set up to investigate the effect of light intensity on rate of gas production from a submerged water plant. Results obtained were recorded in the table below

CANDIDATE NAME _____

Light intensity (Candelas)	Number of gas bubbles/ min
0	0
50	5
100	9
200	15
250	17
300	19
350	20
450	20

a). On the graph paper provided, plot a graph of rate of gas production against light intensity (**6marks**)

b). Name the gas produced by the pond weed.

_____1mark

c).What is the optimum light intensity for gas production

_____1mark

d). Explain the gas production between 350 and 450 candles

_____2marks
